Study #3532

Contributing Projects:

- P607 - Activity 2.2.1: Development and evaluation of herd health packages

Part I: Public communications

Type: Program/project adoption or impact assessment

Status: Completed

Year: 2020

Title: Impact of Community Conversations as a gender transformational approach in small ruminant production in Ethiopia

Commissioning Study: CRP

Part II: CGIAR system level reporting
Links to the Strategic Results Framework:

Sub-IDOs:

- Gender-equitable control of productive assets and resources
- Improved capacity of women and young people to participate in decision-making
- Closed yield gaps through improved agronomic and animal husbandry practices

Is this OICR linked to some SRF 2022/2030 target?: Too early to say

Description of activity / study: Paper on the impact of Community Conversations (an ILRI innovation) as a gender transformational approach in small ruminant production in Ethiopia. The paper synthesizes change stories and reflections of community members and partners captured in activity reports and the before- and after-community conversation knowledge, attitude and practice surveys.

Geographic scope:

- National

Country(ies):

- Ethiopia
