Study #3061

Contributing Projects:

- P1336 - Building Gender and Social Inclusion portfolio in WHEAT AFS, including strategic gender research and inter-CRP collaboration

Part I: Public communications

Type: Synthesis (secondary) study

Status: Completed

Year: 2020

Title: Collaborative analysis of gender norms and wheat agriculture in patriarchal contexts in Afghanistan, Ethiopia and Pakistan

Commissioning Study: CRP WHEAT

Part II: CGIAR system level reporting

Links to the Strategic Results Framework:

Sub-IDOs:

- Technologies that reduce women's labor and energy expenditure adopted

Is this OICR linked to some SRF 2022/2030 target?: Too early to say

Description of activity / study: Building on other recent studies investigating (enabling environments for) women's empowerment. Social norms that encapsulate men as farmers and women as homemakers conflict with the reality that women are workers and decision makers in wheat production systems (Farnworth et al. 2020). Changes in perceptions and norms around farming actors would potentially change the dynamics of household decision making, leading to adoption of new agricultural technologies.

Geographic scope:

- Multi-national

Country(ies):

- Ethiopia
- Afghanistan
- Pakistan
